MANAGEMENT DISCUSSION OF FUND PERFORMANCE

INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of NCM Entrepreneurs Class (the "Fund") is to achieve long-term capital appreciation by investing primarily in securities of smaller capitalization companies.

The Fund achieves this objective by employing a value approach to investments as a primary method of securities selection. This means searching for superior long-term earnings and/or cash flow per share growth companies exhibiting a strong position in the market in which they operate, quality management and balance sheet strength. This analysis is supplemented by quantitative techniques that examine movements in general market trends as well as trends in earnings and the price of securities. The Portfolio Manager believes in investing for the long term and typically makes a decision on a three year plus time horizon.

The Fund may invest in a combination of securities including, but not limited to, government and corporate bonds, short term debt instruments, convertible securities (including convertible bonds and warrants), income trust units and rights, as well as common and preferred shares. These securities are largely Canadian, but may also, as market opportunities dictate, include global securities as well. The Fund may also invest in permitted derivatives and engage in limited short selling in order to achieve its objective.

RISK

The Fund is suitable for investors seeking long-term capital appreciation with a tolerance for medium to high risk. Investors whose primary concern is preservation of capital should not be invested in this Fund. General risks of an investment in NCM Entrepreneurs Class are detailed in the simplified prospectus and include: equity risk, small and mid-capitalization company risk, class and series risk, liquidity risk and regulatory risk, among others.

The Fund's concentration in Industrials and Consumer Discretionary sectors is a significant portion of the portfolio. This potentially increases the Fund's sensitivity to changes in GDP, commodity prices, foreign exchange rates, interest rates, stimulus removal and/or credit conditions. As the Fund invests primarily in smaller companies, the Funds sensitivity to changes in the macroeconomic environment is higher than funds investing in larger companies. These changes create larger price movements for smaller companies and can result in significantly lower liquidity and wider bid-ask differentials than companies with larger market capitalizations.

RESULTS OF OPERATIONS

Canadian micro caps continue to remain out of favour. There is a nervousness from investors which has caused investors to either move up market cap, move out of Canada or out of the market completely. This has led to a general market avoidance for micro caps. The challenge of this is that there is a lack of buying and lack of liquidity. When investors want to sell a micro cap stock they are knocking the stock lower, even on low volume. Without an immediate catalyst for a micro cap stock, there are few buyers right now. This causes good news to be met with a muted response and bad news to be severely punished.

The annual compound return of the Fund was -2.2%, underperforming the benchmark return of 0.0%. The underperformance can be attributed to stock selection and lack of interest in micro caps. The Fund's market cap is considerably smaller than the BMO small cap index.

The Fund's current cash position is approximately 20%. The Fund entered the year with a similar cash level. This gives the Managers of the Fund the ability to methodically deploy cash by taking advantage of the lack of patience from other micro cap investors. The Managers have been cautious overall by deploying cash into companies where we have a high degree of confidence in their earnings outlook. As we allocate the cash, we are thinking as much about downside protection as we are for upside potential.

Our overall outlook for micro caps is mixed. On one hand, the valuations look attractive, but the lack of investor interest has created more near term volatility. Over time we expect that high quality, cash generative businesses will appreciate to their intrinsic value. The timing for this feels like it has been pushed out. We believe this is just a cyclical low point for micro caps and not structural. In the fullness of time, we believe these smaller companies will reflect their intrinsic value, but the timing of this is uncertain, which should provide strong upside potential. We continue to invest the Fund with the same discipline since inception of the Fund by looking for high quality, cash generative business that trade at attractive valuations.

For the period ended September 30, 2018, the Fund earned dividend and interest income amounting to \$1,191,055 and \$241,715, respectively. The change in unrealized depreciation in current value of investments was a decrease of \$6,959,661 and the realized gain on investments was \$3,863,564. Management fees of \$1,145,852 were paid. A performance bonus of \$1,462,536 was also reported. Although the performance bonus is accrued in the accounts daily, payment of the bonus can only occur at calendar quarter ends if all criteria are met. General and administrative costs of \$727,701, related to the operation of the Fund, and withholding tax of \$10,805, were also incurred. As a result of the above, the decrease in net assets attributable to holders of redeemable shares was \$5,010,221. Net assets attributable to holders of redeemable shares at the beginning of the period were \$69,863,582. Proceeds from the sale of shares were \$44,503,405 and redemptions were \$20,153,149. By September 30, 2018, the Fund had net assets attributable to holders of redeemable shares of \$89,203,617.

RECENT DEVELOPMENTS

On August 27, 2018, Norrep Entrepreneurs Class changed its name to NCM Entrepreneurs Class and its annual financial reporting period changed from October 31 to September 30.

Effective November 1, 2017, the Fund adopted IFRS 9 Financial Instruments. The new standard requires assets to be carried at amortized cost or fair value, with changes in fair value recognized in profit and loss (FVTPL) or fair value through other comprehensive income (FVOCI) based on the entity's business model for managing financial assets and the contractual cash flow characteristics of the financial assets.

Assessment and decision on the business model approach used is an accounting judgement.

Upon transition to IFRS 9, the Fund's financial assets and financial liabilities that were classified as fair value through profit and loss (FVTPL) under IAS 39 continued to be categorized as fair value through profit and loss. There were no changes in the measurement attributes for any of the financial assets and financial liabilities upon transition to IFRS 9.

Under IFRS 9, derivatives are classified as FVTPL like other financial assets and liabilities, so there is no requirement to present separately the different component amounts on the Statement of Comprehensive Income as they fall within the same classification; this is a change from the requirement under IAS 39 where derivatives were classified as Held for Trading.

However, Canadian Security Administrators ("CSA") regulatory requirements under NI 81-106 prescribe the individual line items that are required to be disclosed which includes separate disclosure for derivatives.

RELATED PARTY TRANSACTIONS

Management fees of \$1,145,852 were paid to NCM Asset Management Ltd. ("NCM"), formerly named Norrep Capital Management Ltd., the Fund's Manager and Portfolio Manager. Management fees are 2% for Series A and 1% for Series F, of the series net asset value of the Fund and are calculated and paid monthly. A performance bonus of \$1,462,536 was also reported at September 30, 2018. NCM is entitled to a performance bonus of 20% of the excess of the Fund's performance over its benchmark index. The details of the performance bonus calculation are more fully described in the simplified prospectus. In addition, administrative fees of \$106,529 were paid to NCM. Administration fees are charged by NCM at or below cost. They relate to accounting, trading, record keeping, compliance and other administrative costs.

(1) This information is provided as at September 30, 2018 and October 31 for the preceding years presented. The information is in accordance with International Financial Reporting Standards. The opening net asset values for 2015 and 2014 are restated in accordance with International Financial Reporting Standards.

(2) Distributions, if any, are reinvested in additional shares or paid in cash when requested.

(3) Net asset value and distributions are based on the actual number of shares outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of shares outstanding over the financial period. Due to the different methods of calculating individual components of the table, the sum of the individual components will not necessarily equal the ending net asset value.

(1) This information is provided as at September 30, 2018 and October 31 for the preceding years presented. The information is in accordance with International Financial Reporting Standards.

(2) Management expense ratio (MER) is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net asset value of the period. It includes performance bonus, if any.

(3) The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of a period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and performance of the Fund.

(4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

MANAGEMENT FEES

The Fund pays an annual management fee of 2% for the Series A, and 1% for the Series F, multiplied by the series net asset value of the Fund, to NCM, the Fund's Manager and Portfolio Manager. The management fee is calculated and paid monthly. No management fee is charged to the Series I; instead, the investors pay a management fee directly to the manager, in an amount determined through negotiation with the Manager. For the period ended September 30, 2018, management fees amounted to \$1,145,852. NCM paid servicing commissions of \$361,344 (i.e. 31.53%) as well as selling commissions of \$11,032 (i.e. 0.96%) from these management fees to investment dealers.

NCM also received fees for portfolio management and administrative services with respect to this Fund as well as all the other funds in the NCM group. NCM is entitled to a performance bonus of 20% of the excess performance of the Fund compared to its benchmark index multiplied by the weighted average net asset value of the Fund. The performance bonus is more fully described in the simplified prospectus. For the period ended September 30, 2018, a performance bonus of \$1,462,536 was reported.

PAST PERFORMANCE

The charts below illustrate the performance of the Fund since inception on May 31, 2010 to September 30, 2018 in percentages. The Series I inception was November 23, 2012. These charts reflect the performance you would have received if you invested in the Fund on the first day of the period through the last day of the period.

They assume that all distributions made by the Fund in the periods shown are reinvested in additional securities of the investment Fund. They do not take into account sales, redemption, distribution or other optional charges which would have reduced returns or performance. Each period the Fund's performance has changed, and past performance does not guarantee future performance.
