MANAGEMENT DISCUSSION OF FUND PERFORMANCE

INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of Norrep Income Growth Class (the "Fund") is to provide investors with a stable monthly stream of cash distributions and the potential for long term capital appreciation by investing in small and mid capitalization high yield securities of issuers in Canada and the United States.

The Fund achieves this objective by employing a value approach to high yield investments as a primary method of securities selection. This means searching for organizations that are able to maintain and grow their distributions. In addition, the Fund focuses on companies offering superior long-term earnings and cash flow per share growth, and exhibiting a strong position in the market in which they operate, quality management, and balance sheet strength. This analysis is supplemented by quantitative techniques, which examine movements in general market trends, as well as trends in earnings and the price of securities.

The Fund may invest in a combination of securities including common and preferred shares, government and corporate bonds, short-term debt instruments, convertible securities and income trust units. The Fund may also invest in permitted derivatives and engage in limited short selling in order to achieve its objective.

RISK

The Fund is suitable for investors seeking long-term capital appreciation with a tolerance for low to medium risk based on the Fund's standard deviation. General risks of an investment in the Norrep Income Growth Fund are detailed in the simplified prospectus and include equity risk, small and mid capitalization company risk, class and series risk, liquidity risk, interest rate risk, and income trust risk, among others.

The Fund's investment in smaller capitalization companies forms a significant portion of the portfolio. This is generally a volatile asset class. The higher yielding component of the portfolio, including both equities and bonds, makes the Fund somewhat sensitive to changes in interest rates. Finally, the Fund's concentration in the Industrials and Consumer Discretionary sectors potentially increases the Fund's sensitivity to changes in GDP, commodity prices, foreign exchange interest rates, stimulus removal and credit conditions.

RESULTS OF OPERATIONS

The Canadian equity markets have underperformed their global peers to date in 2017 after a strong showing in 2016. The underperformance is due to a number of factors, including the weakness in the energy segment, which accounts for approximately 20% of the TSX index, as well as concerns over the state of the Canadian housing market and NAFTA negotiations. Large cap stocks have outperformed their smaller peers, with the BMO small cap index registering a modest 2.7% gain to date in 2017, which compares with a gain in the TSX index of 7.3%. We attribute this underperformance to the weakness in the energy market (TSX energy sub-index is down 7.9% YTD compared with a 19.6% decline in the BMO Small cap energy sub-index) as well a larger proportion of fund flows into the large cap sector given the ongoing growth of passive investing.

During the twelve-month period, the Fund was up 8.5%, in-line with its index, which was also up 8.5% during the time period. Despite approximately 70% of the Fund's equity exposure allocated to the small cap sector, the Fund was able to keep pace with its larger cap index, thanks to superior stock selection, as well as, focusing the Fund's energy weight to industrial companies with exposure to the energy industry as opposed to pure-play exploration and development companies. We continue to maintain our focus on stock selection as we strive to look for and invest in high-quality, cash generative businesses with strong balance sheets. The Fund continues to underweight the Commodity sector as it is difficult to find high-quality, stable yielding companies in this sector. However earlier this year the Fund increased its weight in the Base Metals sub-sector given our belief that the supply/demand dynamics were coming more in balance after numerous years of supply cuts from producers coupled with an improving global economy.

While we believe we are in the later innings of this economic cycle, and as a result have made a number of changes to the Fund, at this time we remain constructive on the near term outlook for the Canadian equity markets. In addition, we believe that the small cap sector is well positioned to outperform at this stage of the cycle and maintain our focus on companies that are well positioned to grow their dividends in the coming years.

For the year ended October 31, 2017, the Fund earned interest and dividend income amounting to \$1,090,352 and \$3,538,709, respectively. The change in unrealized depreciation in current value of investments was a decrease of \$965,986 and the change in unrealized gain on derivative instruments was an increase of \$11,995. The realized gain on investments was \$6,142,277 and the realized gain on derivative instruments was \$479,986. Management fees of \$1,626,926 were paid. General and administrative costs were \$663,149. As a result of the above, the increase in net assets attributable to holders of redeemable shares was \$8,007,258. Net assets attributable to holders of redeemable shares at the beginning of the year were \$110,523,902. Proceeds from the issuance of shares were \$17,079,818; reinvestment of dividends was \$4,426,897 and redemptions were \$35,906,117. Dividends declared to holders of redeemable shares were \$5,712,813. By October 31, 2017, the Fund had net assets attributable to holders of redeemable shares of \$98,418,945.

RECENT DEVELOPMENTS

On June 29, 2017, MF Series was renamed as Series A.

Future accounting pronouncements:

IFRS 9 Financial Instruments introduces new requirements for the classification and measurement of financial assets. The standard contains two primary measurement categories for financial assets: amortized cost and fair value. IFRS 9 also introduces new requirements to address the impairment of financial assets.

The mandatory effective date of IFRS 9 for the Fund is for the fiscal year beginning November 1, 2018.

The Manager has reviewed the standard and does not anticipate a material impact on the Fund.

RELATED PARTY TRANSACTIONS

Management fees of \$1,626,926 were paid to Norrep, the Fund's Manager and Portfolio Manager. Management fees are 1.65% for the Series A, 1% for the Series F, and 2% for the Series B, of the series net asset value of the Fund and are calculated and paid monthly. In addition, administrative fees of \$140,098 were paid to Norrep. Administration fees are charged by Norrep at or below cost. They relate to accounting, trading, record keeping, compliance and other administrative costs.

(1) This information is provided as at October 31 for the years presented. The information is in accordance with International Financial Reporting Standards with the exception of 2013 which is in accordance with Canadian GAAP. The opening net asset values for 2015 and 2014 are restated in accordance with International Financial Reporting Standards.

(2) The net asset value presented in the financial statements differs from the net asset value calculated for fund pricing purposes for the 2013 year. (An explanation of this difference can be found in the notes to the prior financial statements.)

(3) Distributions, if any, are reinvested in additional shares or paid in cash when requested.

(4) Net asset value and distributions are based on the actual number of shares outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of shares outstanding over the financial year. Due to the different methods of calculating individual components of the table, the sum of the individual components will not necessarily equal the ending net asset value.

(2) Management expense ratio (MER) is based on total expenses for the stated year and is expressed as an annualized percentage of daily average net asset value of the year.

(3) The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of a year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and performance of the Fund.

(4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year.

MANAGEMENT FEES

The Fund pays an annual management fee of 1.65% for the Series A, 1% for the Series F, and 2% for the Series B, multiplied by the series net asset value of the Fund, to Norrep, the Fund's Manager and Portfolio Manager. The management fee is calculated and paid monthly. No management fee is charged to the Series I; instead, the investors pay a management fee directly to the Manager, in an amount determined through negotiation with the Manager. For the year ended October 31, 2017, management fees amounted to \$1,626,926. Norrep paid servicing commissions of \$573,537 (i.e., 35.25%) as well as selling commissions of \$3,789 (i.e., 0.23%) from these management fees to investment dealers. Norrep also received fees for portfolio management and administrative services with respect to this Fund as well as all the other funds in the Norrep group.

PAST PERFORMANCE

The charts below illustrate the performance of the Fund for its last 10 fiscal years as a public mutual fund. The inception date of the Series B was June 30, 2011 and the inception of the Series I was March 29, 2012. These charts reflect the performance you would have received if you invested in the Fund on the first day of the period through the last day of the period.

The charts assume that all distributions made by the Fund in the periods shown are reinvested in additional securities of the Fund. They do not take into account sales, redemptions, distributions or other optional charges, which would have reduced returns or performance. Each period the Fund's performance changes and past performance does not guarantee future performance.
