<p>How risky is it?</p> <p>The value of the Fund can go down as well as up. You could lose money.</p> <p>One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".</p> <p>In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.</p>	<p>Risk rating</p> <p>NCM Asset Management Ltd. has rated the volatility of this Fund as low to medium.</p> <p>Because this is a new fund, the risk rating is only an estimate by NCM Asset Management Ltd. Generally, the rating is based on how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.</p> <div style="text-align: center;"> </div> <p>For more information about the risk rating and specific risks that can affect the Fund's return, see the Risk section of the Fund's simplified prospectus.</p>

A word about tax

In general, you'll have to pay income tax on any money you make on the Fund. How much you pay depends on the tax laws where you live and whether or not you hold the Fund in a registered plan such as a Registered Retirement Savings Plan, or a Tax-Free Savings Account.

Keep in mind that if you hold your Fund in a non-registered account, distributions are included in your taxable income, whether you get them in cash or have them reinvested.

Fund distributions that are a return of capital are not included in your taxable income, but will affect your capital gains or losses on disposition.

The fees and expenses – including any commissions – can vary among series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another.
