MANAGEMENT REPORT OF FUND PERFORMANCE
NCM ENERGY PLUS CLASS

MANAGEMENT REPORT OF FUND PERFORMANCE

NCM ENERGY PLUS CLASS

This annual management report of fund performance contains financial highlights but does not contain the annual financial statements of the investment fund. You can get a copy of the Fund's financial statements at your request, and at no cost, by calling toll free (877) 531-9355, by writing us at 1850, 333-7th Avenue SW Calgary, Alberta T2P 2Z1 or by visiting our website at www.ncminvestments.com or SEDAR at www.sedar.com.

Security holders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of NCM Energy Plus Class (the "Fund") is to achieve long-term capital appreciation by investing in both Canadian and foreign resource companies.

The Fund achieves this objective by employing a value approach to investments as a primary method of securities selection. This involves selecting equities with a high potential for share price appreciation that can be realized from a revaluation of the company, growth from developing a resource prospect, and/or exposure to rising commodity prices.

The Fund may invest in a combination of securities including, but not limited to, common and preferred shares, government and corporate bonds, short-term debt instruments, convertible securities (including convertible bonds and warrants), and income trust units. These securities are primarily Canadian, but may also, as market opportunities dictate, include global securities as well. The Fund may also invest in permitted derivatives and engage in limited short selling in order to achieve its objective.

RISK

The Fund is an all cap energy portfolio. The Fund is subject to a series of risks, some of which include: equity risk, commodity risk, small cap, mid cap, and micro cap company risk, foreign operations risk, and financial risk. The Fund is suitable for high risk investors seeking long-term growth who can tolerate the cyclical nature of the Energy sector.

Equity Risk:

Due to the Fund's equity focus, it is subject to standard market risks. The individual securities are subject to individual company developments and to general economic and financial conditions. To the extent that the Fund remains focused on equity investments, the equity risk has not changed.

The concentrated nature of the portfolio magnifies the risks associated with the individual securities.

RISK (continued)

Commodity Risk:

The Fund's focus on the Energy sector subjects it to commodity risk. A decline in commodity prices would have a negative impact on equity prices. Oil prices continue to be volatile and we expect the volatility to continue due to uncertainty over the Organization of Petroleum Exporting Countries ("OPEC") supply, geopolitical tensions, global economic growth, and other macroeconomic factors. North American natural gas prices have also generally been weak as supply has been growing at a faster rate than demand. Natural gas storage levels in western Canada have been slightly lower than historical averages, which could be positive for prices in western Canada. Weather also has a significant impact on natural gas prices which adds to the uncertainty of prices in the future.

Small Cap, Mid Cap, and Micro Cap Company Risk:

The Fund's all cap focus allows it to adjust weightings depending on the opportunities available across the different market capitalizations. Investments in small, mid cap, and micro cap companies may involve greater risk than in larger more established companies due to a series of factors ranging from financing risk through to liquidity risk. The Fund manages these risks by continually monitoring the overall liquidity of the portfolio and investing in companies with high quality management teams, strong balance sheets, and visible growth profiles.

Foreign Operations Risk:

The Fund may have positions in companies with operations in foreign countries. The value of these investments may be influenced by such factors as foreign government policies and political or social instability. The Fund manages this exposure by minimizing exposure to unstable countries. As of September 30, 2019, the Fund had investments in ten companies with significant exposure to foreign operations that include the United States, Columbia, and other jurisdictions.

Financial Risk:

The capital intensive nature of the Energy sector exposes the Fund to financial risk. Growth-oriented energy companies generally employ high reinvestment rates and this frequently requires a component of debt financing. The Fund mitigates financial risk by investing in companies with healthy balance sheets, strong production bases, high quality assets, and experienced management teams.

The risks of investing in the Fund are more fully discussed in the Fund's Simplified Prospectus.

RESULTS OF OPERATIONS

The Fund is an all capitalization energy portfolio with a historical bias towards small and mid capitalization energy companies. However, given current market dynamics there has been a shift towards more liquid, higher capitalization companies. We target companies trading at attractive valuations with experienced management teams, strong balance sheets, growth in reserves, production, and cash flow per share, and with an expanding prospect inventory.

For the year ended September 30, 2019, the annual compound return of the Fund was -43.5%. This compares to the S&P/TSX Capped Energy Total Return Index, which saw a return of -26.9% over the same period. The last year has generally been a difficult year for long-only Canadian energy investors. Many investors remain concerned about the outlook for egress in western Canada.

We see potential for egress improvements in the years ahead. On the natural gas side, TC Energy is in the midst of advancing a \$8.8 billion expansion of the NGTL System in western Canada. This expansion is expected to add more than 3 billion cubic feet per day (“Bcf/d”) of delivery capacity to the system. Shell and its partners announced a positive Final Investment Decision (“FID”) on LNG Canada in October 2018. The project’s first two trains are expected to have takeaway capacity of approximately 2 Bcf/d by 2025. The project also has the potential to double in size by adding a third and fourth train. Assuming these projects are executed, we expect it will improve the price realizations for western Canadian gas producers in the years ahead.

On the oil front, Enbridge’s Line 3 Replacement Project (“L3RP”) has faced various regulatory delays. On September 17, 2019 the Minnesota Supreme Court ruled that a further review of the L3RP’s Final Environmental Impact Statement is not necessary. This ruling allows the Minnesota Public Utilities Commission to move forward with the permitting process for the project. The L3RP is expected to increase pipeline takeaway capacity by around 370,000 barrels per day (“b/d”).

Longer-term the potential expansion of Keystone XL and/or Trans Mountain remain in the regulatory process. Should these expansions be built, it should result in narrowing differentials for western Canadian oil producers.

Globally, oil prices and the share prices of many energy producers increased considerably following a September 14, 2019 attack on oil processing facilities in Abqaiq and Khurais in eastern Saudi Arabia. Houthis (which Saudi Arabia has designated as terrorist organization) has claimed responsibility, but Saudi Arabia believes Iran is responsible for the attack. As the facilities have been repaired and begun to come back into operations, the oil price has generally fallen. However, media reports indicate it could take months for the facilities to return to operating at full capacity. The next OPEC meeting is scheduled for December 5, 2019. Following this meeting, we should have a clearer outlook for OPEC oil supply plans in 2020 and beyond.

The International Energy Agency (“IEA”) forecasts that demand will grow by ~1.2 million b/d annually through at least 2024. The IEA sees no peak oil demand as growth in emerging markets, petrochemicals and jet fuel more than offset a slowdown in gasoline demand due to efficiency gains and electric vehicles. The IEA forecasts that 44% of the global growth in oil demand through 2024 will come from China and India and that by 2024, India’s oil demand growth will match that of China. The IEA is forecasting Non-OPEC export growth to be led by United States, Brazil, Norway and Guyana, while they see declines in Iran and Venezuela. They also describe the situation in Libya as “still-fragile”.

RESULTS OF OPERATIONS (continued)

2019 has seen a recovery in crude oil prices from the end of calendar 2018. However, the improvement has generally not been reflected in the share price of most Canadian producers. Historically, most producers were focused on growing production and were willing to spend in excess of their cash flow (generally by issuing debt and/or equity). In the current environment, most companies are putting a greater emphasis of capital discipline and on generating free cash flow.

The positions in the portfolio are high quality companies that we believe are trading at attractive valuations and have significant upside as the volatility and negative momentum subsides. These companies have strong balance sheets, generate meaningful cash flows, and have the assets to generate economic returns even in a low commodity price environment.

As of September 30, 2019, the composition of the portfolio was approximately 15% large cap, 21% mid cap, 56% small cap, 6% micro cap and 2% net cash. Included in that is three service/infrastructure companies comprising about 10% of the portfolio. This portfolio compares to the September 30, 2018 portfolio, which was approximately 38% large cap, 29% mid cap, 31% small cap and 2% net cash.

The majority of the Fund's positions are in companies focused on either oil, natural gas, or both. Our focus is on profitability, growth, valuation, liquidity, and low financial leverage. While we see strong opportunities in the mid and small cap space for the medium term, we have increased exposure to lower beta, larger cap names until more visibility on the sustained oil rally is evident.

For the year ended September 30, 2019, the Fund earned interest and dividend income amounting to \$1,669 and \$293,060, respectively. The change in unrealized depreciation in current value of investments was a decrease of \$6,245,246. The realized loss on investments was \$4,255,560. Management fees of \$178,134 were paid. General and administrative costs of \$174,489 related to the operations of the Fund were also incurred. As a result of the above, the decrease in net assets attributable to holders of redeemable shares was \$10,558,700.

Net assets attributable to holders of redeemable shares at the beginning of the year were \$25,567,155. Proceeds from the issuance of shares were \$317,927, reinvestment of distributions was \$489,705 and redemptions were \$3,813,082. Distributions declared to holders of redeemable shares were \$498,908. By September 30, 2019, the Fund had net assets attributable to holders of redeemable shares of \$11,504,097.

RELATED PARTY TRANSACTIONS

Management fees of \$178,134 were paid to NCM Asset Management Ltd. ("NCM"), the Fund's Manager and Portfolio Manager. Management fees are 2% for Series A and 1% for Series F, of the series net asset value of the Fund and are calculated and paid monthly. In addition, administrative fees of \$24,517 were paid to NCM. Administration fees are charged by NCM at or below cost. They relate to accounting, trading, record keeping, compliance and other administrative costs.

FINANCIAL HIGHLIGHTS

The following tables show selected key financial information about the Fund's Series A shares and are intended to help you understand the Fund's financial performance for the fiscal years indicated. This information is derived from the Fund's audited annual financial statements.

Net asset value (NAV) per share⁽¹⁾ – Series A	2019	2018	2017	2016	2015
Net Asset Value, beginning of year	\$7.78	\$7.75	\$9.86	\$9.54	\$13.80
Increase (decrease) from operations:					
Total revenue	0.10	0.08	0.15	0.18	0.23
Total expenses	(0.19)	(0.20)	(0.26)	(0.28)	(0.35)
Realized gains (losses) for the year	(1.41)	(0.86)	(0.34)	(2.45)	1.40
Unrealized gains (losses) for the year	(2.07)	0.94	(1.76)	2.78	(5.08)
Total (decrease) increase from operations	(3.57)	(0.04)	(2.21)	0.23	(3.80)
Distributions:					
From income	Nil	Nil	Nil	Nil	Nil
From dividends	Nil	Nil	Nil	Nil	Nil
From capital gains	0.16	Nil	0.08	Nil	Nil
Total distributions ⁽²⁾	0.16	Nil	0.08	Nil	Nil
Net Asset Value, end of year ⁽³⁾	\$4.20	\$7.78	\$7.75	\$9.86	\$9.54

(1) This information is provided as at September 30, 2019 and 2018 and October 31 for the balance preceding years presented. The information is in accordance with International Financial Reporting Standards. The opening net asset values for 2015 was restated in accordance with International Financial Reporting Standards.

(2) Distributions, if any, are reinvested in additional shares or paid in cash when requested.

(3) Net asset value and distributions are based on the actual number of shares outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of shares outstanding over the financial year. Due to the different methods of calculating individual components of the table, the sum of the individual components will not necessarily equal the ending net asset value.

Ratios and Supplemental Data – Series A⁽¹⁾	2019	2018	2017	2016	2015
Net Assets (000's of \$)	5,524	12,291	15,235	26,809	26,324
Number of shares outstanding	1,315,872	1,580,498	1,966,624	2,718,747	2,760,524
Management expense ratio (MER) ⁽²⁾	2.89%	2.75%	2.67%	2.65%	2.06%
MER before waivers or absorptions ⁽²⁾	2.89%	2.75%	2.67%	2.65%	2.06%
Portfolio turnover rate ⁽³⁾	47.82%	53.63%	56.08%	40.88%	82.31%
Trading expense ratio ⁽⁴⁾	0.32%	0.17%	0.23%	0.28%	1.02%
Net asset value per share	\$4.20	\$7.78	\$7.75	\$9.86	\$9.54

(1) This information is provided as at September 30, 2019 and 2018 and October 31 for the balance preceding years presented. The information is in accordance with International Financial Reporting Standards.

(2) Management expense ratio (MER) is based on total expenses for the stated year and is expressed as an annualized percentage of daily average net asset value of the year.

(3) The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of a year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and performance of the Fund.

(4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year.

FINANCIAL HIGHLIGHTS (continued)

The following tables show selected key financial information about the Fund's Series F shares and are intended to help you understand the Fund's financial performance for the fiscal years indicated. This information is derived from the Fund's audited annual financial statements.

A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of a year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and performance of the Fund.

(4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year.

MANAGEMENT FEES

The Fund pays an annual management fee of 2% for the Series A, and 1% for the Series F, multiplied by the series net asset value of the Fund, to NCM, the Fund's Manager and Portfolio Manager. The management fee is calculated and paid monthly. No management fee is charged to the Series I; instead, the investors pay a management fee directly to the manager, in an amount determined through negotiation with the Manager. For the year ended September 30, 2019, management fees amounted to \$178,134. NCM paid servicing commissions of \$72,132 (i.e. 40.49%) from these management fees to investment dealers.

NCM also received fees for portfolio management and administrative services with respect to this Fund as well as all the other funds in the NCM group. NCM is entitled to a performance bonus of 20% of the excess performance of the Fund compared to its benchmark index multiplied by the weighted average net asset value of the Fund. The performance bonus is more fully described in the simplified prospectus. For the year ended September 30, 2019, the performance bonus reported was \$nil.

PAST PERFORMANCE

The charts below illustrate the performance of the Fund since inception on May 31, 2009 to September 30, 2019 in percentages. For the Series I, the inception date was March 29, 2012. These charts reflect the performance you would have received if you invested in the Fund on the first day of the year through the last day of the year.

They assume that all distributions made by the Fund in the years shown are reinvested in additional securities of the Fund. They do not take into account sales, redemption, distribution or other optional charges which would have reduced returns or performance. Each year, the Fund's performance has changed and past performance does not guarantee future performance.

YEAR BY YEAR RETURNS

Series A

From November 1 to October 31 until 2018 which is from November 1, 2017 to September 30, 2018 then October 1 to September 30 thereafter.

YEAR BY YEAR RETURNS (continued)

Series F

From November 1 to October 31 until 2018 which is from November 1, 2017 to September 30, 2018 then October 1 to September 30 thereafter.

Series I

From March 29, 2012 to October 31, 2012 then November 1 to October 31 until 2018 which is from November 1, 2017 to September 30, 2018 then October 1 to September 30 thereafter.

ANNUAL COMPOUND RETURNS

The following table shows the percent compounded returns to September 30, 2019 for each series of the Fund for the years indicated. It also shows the returns for the S&P/TSX Capped Energy Total Return Index, which is the Fund's benchmark index.

	Series A	Series F	Series I	Index
One year	-44.6%	-43.5%	-42.4%	-26.9%
Three Year*	-25.0%	-23.9%	-22.7%	-9.5%
Five Year*	-23.1%	-22.0%	-20.8%	-11.6%
Ten Year*	-6.2%	-5.0%		-4.5%
Since Inception* – Series A (May 31, 2009)	-4.2%			-3.8%
Since Inception* – Series F (May 31, 2009)		-3.0%		-3.8%
Since Inception* – Series I (March 29, 2012)			-9.2%	-5.6%

* annualized

SUMMARY OF INVESTMENT PORTFOLIO

The following investments were held by the Fund as at September 30, 2019.
