What does the Fund invest in?

The Fund invests in equities of all market capitalizations in Canada's resource sector using a value methodology commonly referred to as "growth at a reasonable price". This approach means targeting resource companies that (a) have a strong management team; (b) are trading below intrinsic value or at discount to peers; and (c) have above average growth prospects. The Fund will invest in companies with a high potential for share price appreciation that can be realized from a revaluation of the company, growth from a developing a resource prospect, and/or from exposure to rising commodity prices. This Fund is classified as an Energy Equity fund, thus it must invest at least 90% of its equity holdings in the securities of companies in the Energy sector.

Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.
