What does the Fund invest in?

The Fund invests primarily in dividend-paying U.S. equities across all size classifications. Security selection within the portfolio follows a bottom-up approach, which emphasizes careful company specific analysis. This involves evaluating the financial condition, management and prospects of each company, its industry and the overall economy. The Portfolio Manager typically emphasizes a value investment approach to select stocks. Valuation measures such as price-to-earnings and price-to-cash flow will be considered relative to a firm's growth prospects. The Portfolio Manager will focus on quality companies with stable, growing businesses and strong balance sheets and will select companies that offer the potential for future growth in earnings and/or cash flow. Fundamental analysis is supplemented by quantitative techniques, which identify potentially attractive securities based on a combination of attributes in areas such as valuation, growth, profitability, momentum and risk. The Fund is classified as a US Equity fund thus, it must invest at least 90% of its equity holdings in securities domiciled in the United States.

How risky is it?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

NCM Asset Management Ltd. has rated the volatility of this Fund as **medium**.

This rating is based on how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see "What are the Risks of Investing in the Fund?" section of the Fund's simplified prospectus.

No guarantees

Like most mutual funds, this Fund doesn't have any guarantees. You may not get back the amount of money you invest.

How has the Fund performed?

This section tells you how the Series A shares of the Fund have performed over the past 10 calendar years. Returns are after expenses have been deducted. These expenses reduce the Fund's return.

Year-by-year returns

This chart shows how the Series A shares of the Fund have performed over each of the past 10 calendar years. The Series decreased in value in 2 of the last 10 calendar years. The range of returns and change from year to year can help you assess how risky the Fund has been in the past. It does not tell you how the Fund will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for the Series A shares of the Fund in a 3-month period over the past 10 calendar years and from January 1, 2019 to March 31, 2019. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	17.7%	November 30, 2010	Your investment would rise to \$1,177.37
Worst return	-23.9%	September 30, 2011	Your investment would drop to \$761.36

Average return

As at March 31, 2019, a person who invested \$1,000 in the Fund for the last 10 years now has \$3,258.92 This works out to an annual compound return of 12.5%.

Who is this Fund for?

This Fund is suitable for investors who:

- Wish to invest primarily in U.S. dividend-paying equities of all capitalization
- Have a medium to long-term time horizon
- Want the potential for monthly income and long term capital appreciation
- Are comfortable with medium investment risk (i.e. can tolerate volatility in the market value of your investment)

A word about tax

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

The following tables show the fees and expenses you could pay to buy, own and sell Series A shares of the Fund. The fees and expenses – including any commissions – can vary among series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

1. Sales charges

You have to choose a sales charge option when you buy the Fund. Ask about the pros and cons of each option.

Sales Charge Option	What you Pay		How it Works
