Except where indicated otherwise, F Series data as of July 31, 2025, net of fees, annualized. On May 21, 2024, the NCM Conservative Income Portfolio was renamed NCM Global Income Balanced Portfolio. The contents of this document are intended for information purposes only and should not be considered an advertisement or offer to sell or solicitation to buy any securities in any jurisdiction. Mutual fund shares or units of NCM Investments are offered for sale by way of prospectus in all provinces and territories of Canada. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the NCM Investments prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in share or unit value and reinvestment of all dividends or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual fund securities are not guaranteed, their values change frequently and past performance may not be repeated. If we have included a rate of return or mathematical table to illustrate the potential effects of a compound rate of return, it is not intended to reflect future values of the mutual fund or returns on investment in the mutual fund. Each series of the Fund has a different management fee, and accordingly the performance of each series will differ. Performance data for other series can be found at [www.ncminvestments.com](http://www.ncminvestments.com). NCM Asset Management Ltd. as manager and portfolio manager of the Funds may engage one or more sub advisors to provide investment management services to certain Funds, including its affiliate, Cumberland Investment Counsel Inc. Please refer to the NCM Investments prospectus for more information.

## KEY METRICS

Beta	Correlation	Standard Deviation	Sharpe Ratio
0.63	0.89	5.1%	1.32

Time Period: 3 Year. Beta represents the tendency of the fund's return to respond to the benchmark; a lower value indicates less market risk. Correlation measures how the fund moves in relation to the benchmark: +1 is a perfect positive correlation. Standard Deviation is a measure of volatility; it shows how the Fund's returns have varied over a given time period. Sharpe Ratio measures the performance of an investment after adjusting for its risk.
