PORTFOLIO RISK

LOW	MED	HIGH

Risk level is determined using the CSA risk classification methodology based on the Fund's ten-year standard deviation. If a Fund does not have ten years of performance history, the risk level is calculated using the Fund's actual return history and the return history of its benchmark (which is expected to reasonably approximate the Fund's standard deviation) for the remainder of the ten year period.

Except where indicated otherwise, M Series data as of November 30, 2025, net of fees, annualized. Benchmark: Morningstar Developed Markets Target Market Exposure NR CAD (100% Long). The benchmark represents the Fund's investment universe and net long position. Effective December 1, 2017, the fund's investment objective was changed to increase the fund's exposure to global equity markets. Performance prior to this date would have been different had the current objective been in effect. The Fund's portfolio manager also has the ability to invest a portion of the assets in cash and cash equivalents and/or high yield debt on a temporary basis when deemed advisable based on market conditions.
