MANAGEMENT REPORT OF FUND PERFORMANCE  
**NCM CORE CANADIAN**

# MANAGEMENT REPORT OF FUND PERFORMANCE NCM CORE CANADIAN

---

This annual management report of fund performance contains financial highlights but does not contain the annual financial statements of the investment fund. You can get a copy of the Fund's financial statements at your request, and at no cost, by calling toll free (877) 531-9355, by writing us at 1800, 333-7<sup>th</sup> Avenue SW Calgary, Alberta T2P 2Z1 or by visiting our website at [www.ncminvestments.com](http://www.ncminvestments.com) or SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca)

Security holders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

## MANAGEMENT DISCUSSION OF FUND PERFORMANCE

---

### INVESTMENT OBJECTIVE AND STRATEGIES

NCM Core Canadian (the "Fund") investment objective is to provide investors with large cap Canadian equity exposure with reduced volatility while creating a Fund that looks significantly different than the S&P/TSX Index. To accomplish this objective, we mostly buy lower Beta (historically less volatile) stocks in the portfolio and are typically underweight the more volatile sectors such as Energy and Materials. Our focus is on ensuring the overall portfolio has lower volatility than the market although we will own some higher volatility securities at certain times of the market cycle.

The Fund searches the Canadian universe for stocks with lower volatility, high profitability, strong momentum characteristics, good growth profiles and solid yields; and then overlays a value investing style before deciding which stocks are included. The result is a value portfolio that often underweights direct exposure to cyclical stocks that the average Canadian equity fund possesses. We strive to create a portfolio with high active share, which means we look significantly different than the index and most of the other large cap Canadian equity funds. We are also very active in that we sell companies that are not meeting our expectations quickly and replace them with new ideas.

Finally, unlike most Canadian equity funds, we have made the commitment to be 100% Canadian with our investment choices. All the holdings in the Fund trade on Canadian exchanges.

The Fund may invest in a combination of securities including but not limited to common and preferred shares, government and corporate bonds (including convertible bond and warrants), short-term debt instruments, convertible securities, income trust units, and rights. The Fund may also invest in permitted derivatives and engage in limited short selling in order to achieve its objective.

### RISK

The Fund is a large cap Canadian equity portfolio and is suitable for investors who are prepared to accept medium risk and volatility while seeking long-term growth. The Fund is subject to a series of risks, some of which include Equity Risk, Market Cap Risk, Currency Risk, Interest Rate Risk, and Credit Risk.

#### Equity Risk

Due to the Fund's equity focus, it is subject to standard market risks. The individual securities are subject to individual company developments and to general economic and financial conditions. The equity risk has not changed. For the year ended September 30, 2024, the Fund held 36 long securities diversified across ten sectors.

#### Market Cap Risk

The Fund's large cap focus allows it to easily sell investments as desired, minimizing the concern regarding the liquidity of the securities. The Fund continues to own both mid cap and small cap equities as well. The breakdown at the end of September 2024 was 70% large cap, 20% mid cap, 8% small cap and 2% cash. Liquidity of these smaller companies is constantly monitored and is of no concern.

#### Currency Risk

The Fund is comprised solely of Canadian listed companies; however, several of these companies have operations in foreign jurisdictions, such as the United States. Revenues and earnings are affected when converted back to Canadian dollars for reporting purposes. To the extent that the Fund

## RISK (continued)

maintains exposure to companies operating in foreign jurisdictions, there is the potential for it to be adversely impacted by currency risk.

### Interest Rate Risk

Interest rates increased since the beginning of COVID but we have recently started to see interest rate cuts in Canada and the United States. We expect these rates cuts to continue over the next 12-18 months. Some stocks do better in rising interest rate environments and others do better in lower interest rate environments. The Fund is positioned based on our expectations that rate cuts will continue.

### Credit Risk

The Fund closely monitors the balance sheets of the individual positions and takes a conservative approach to debt. Access to credit is reasonable and the cost of borrowing should continue to improve with lower rates. The companies in the Fund, as a whole, should not have any issues with accessing capital given they are generally large cap securities.

## RESULTS OF OPERATIONS

Given NCM Core Canadian is a low volatility fund, we compare the performance to both the S&P/TSX Low Volatility index as well as the broader, more volatile S&P/TSX. It had been a difficult 48 months for the low volatility index versus the S&P/TSX but we saw that change over the last six months.

On both an absolute and relative basis it was an excellent twelve month period ending September 30, 2024. NCM Core Canadian managed to generate a return of 30.9%, ahead of both the S&P/TSX Low Volatility Index at 30.5% and the S&P/TSX Composite Total Return Index ("S&P/TSX") which returned 26.7%.

Performance was particularly strong in the latest six months of the fiscal year as the Fund returned 15.8%. For the latest six-month period, the S&P/TSX Low Volatility Index returned 13.8% versus 10.0% for the S&P/TSX. NCM Core Canadian significantly outperformed both of these indices over the six-month time period.

The outperformance of NCM Core Canadian over the S&P/TSX in fiscal 2024 was a result of our lower volatility mandate, stock selection and trading around our core positions. Our positions in Propel Holdings, Lundin Gold, Celestica, Bird Construction, and Loblaws were the biggest contributors to outperformance. Given that we sell our "losers" quickly, no individual name was a significant detractor of performance.

Given the Fund's lower volatility mandate, we see the recent relative outperformance of the low volatility index as a potential tailwind in the coming year as it continues the catch-up trade on the broader S&P/TSX Index after its underperformance from the previous four years.

As of September 30, 2024, the Fund had 8.4% exposure to Energy versus the S&P/TSX at 16.7%. The Fund was overweight the Industrials, Consumer Discretionary, Consumer Staples, Communications Services and Real Estate sectors. The Fund was underweight the Energy, Materials, Health Care, Financials, and Technology sectors. The Fund was market weight the Utilities sector.

We made a few changes to the portfolio over the last six months. We decreased the Fund's Energy exposure to 8.4% from 20.0%. We also decreased our exposure to Industrials and Technology. Finally, we increased our exposure to Consumer Discretionary, Consumer Staples, Communication Services, and Real Estate. We do not expect any major changes to our sector exposures over the coming months but if we make any, we suspect that it will be to add higher yielding securities across multiple sectors. As always, we were active with regards to trading in the Fund. We believe that we can add value by trading around our core positions in these volatile times.

We continue to focus on creating a portfolio with very strong attributes as compared to the market. The Fund, as always, trades at a discount to the market based on price-to-earnings multiple on both a trailing and a forward basis. The companies in the portfolio remain significantly more profitable based on return on equity, they have higher growth rates, a higher free cash flow yield, and have a dividend yield of about 3.0% compared to the S&P/TSX at 2.9%. Finally, the stocks in the Fund have excellent momentum characteristics, which have historically been the biggest contributor to performance.

## RESULTS OF OPERATIONS (continued)

Going forward, we expect the portfolio to stick to its strict discipline and active management investment style. We expect to continue to quickly exit positions that are not working in our favour and to establish new positions in securities that are reporting good results. We will stick to our discipline of creating a lower Beta portfolio of dividend paying stocks that trade at a reasonable valuation as a means of providing guarded growth.

On May 27, 2024, the Fund moved from a T+2 settlement period to a T+1 settlement period for securities. This means that securities transactions will settle on the next business day following their transaction date instead of two days following their transaction date.

The net assets have increased by 36.2% with net assets increasing from \$11,136,040 to \$15,162,461, \$3,328,089 of this change is attributable to positive investment performance and \$698,332 was due to positive net contributions to the Fund.

## RELATED PARTY TRANSACTIONS

There are no new related party transactions that required the Independent Review Committee's ("IRC's") approval or recommendation.

Management fees of \$137,895 were incurred to NCM Asset Management Ltd. ("NCM"), the Fund's Manager and Portfolio Manager. Management fees are 1.75% for Series A and 0.75% for Series F, of the series net asset value of the Fund and are calculated and paid monthly. In addition, administrative fees of \$11,828 were paid to NCM. Administration fees are charged by NCM at or below cost. They relate to accounting, trading, record keeping, compliance and other administrative costs.

## RECENT DEVELOPMENTS

NCM Core Canadian uses a bottom-up investment style in that it looks for the best opportunities for investment regardless of sector or the current state of the economy. Having said that, the factor-based models that it uses to make investment decisions includes momentum factors which are influenced by economic conditions. As we said earlier, we expect to see continued interest rate cuts which we believe

will lead to renewed interest in higher yielding securities in sectors that have underperformed such as Communication Services and Real Estate. As such, we have increased our exposure to those sectors over the past few months.

We also believe that after four years of underperformance (before the latest six months of outperformance), that low volatility securities will once again shine which would act as a strong tailwind for NCM Core Canadian.

Given that this fund has the ability to quickly adjust to the market, we will make the necessary changes if and when we see a need. However, the Fund will stick to its lower volatility mandate with strong growth prospects and a value overlay.

On October 8, 2024, Mike Robinson completed his IRC term and Mark Pratt fulfilled the open position.

## FINANCIAL HIGHLIGHTS

The following tables show selected key financial information about the Fund's shares and are intended to help you understand the Fund's financial performance for the fiscal years indicated. This information is derived from the Fund's audited annual financial statements.

### Net asset value (NAV) per share <sup>(1)</sup>

Series A	2024	2023	2022	2021	2020

(1) This information is provided as at September 30 in accordance with IFRS Accounting Standards.

(2) Distributions, if any, are reinvested in additional shares or paid in cash when requested.

(3) Net asset value and distributions are based on the actual number of shares outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of shares outstanding over the financial year. Due to the different methods of calculating individual components of the table, the sum of the individual components will not necessarily equal the ending net asset value.

- (1) This information is provided as at September 30 in accordance with IFRS Accounting Standards.
- (2) Management expense ratio (MER) is based on total expenses for the stated year and is expressed as an annualized percentage of daily average net asset value of the year.
- (3) The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of a year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and performance of the Fund.
- (4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year.

## MANAGEMENT FEES

The Fund pays an annual management fee of 1.75% for Series A, and 0.75% for Series F, multiplied by the series net asset value of the Fund, to NCM, the Fund's Manager and Portfolio Manager. Management fees are calculated and paid monthly. No management fees are charged to Series Z; instead, the investors pay an annual flat management fee up to \$1,000, per account, directly to the Manager. Series O shares are only available for investment by the NCM Funds and other funds and accounts managed or advised by the Manager and/or its affiliates and are not available for public purchase. Series M shares are not available for general public purchase. The Manager and its affiliates offer wealth management services including fee-based and managed accounts under the Cumberland Private Wealth brand, and the Series M shares are intended for such accounts. There is no management fee attached to Series O and Series M. For the year ended September 30, 2024, management fees amounted to \$137,895. NCM paid servicing commissions of \$53,098 (i.e. 38.51%) from these management fees to investment dealers. NCM also received fees for portfolio management and administrative services with respect to this Fund, as well as, all the other Funds in the NCM group.

## PAST PERFORMANCE

The charts below illustrate the performance of the Fund since inception in percentages. These charts reflect the performance you would have received if you invested in the Fund on the first day of the financial year through the last day of the financial year.

They assume that all distributions made by the Fund in the years shown are reinvested in additional securities of the investment Fund. They do not take into account sales, redemption, distribution or other optional charges which would have reduced returns or performance. Each year the Fund's performance has changed, and past performance does not guarantee future performance.

## YEAR BY YEAR RETURNS

### Series A

### Series F

### Series Z
